Kids Receive Tours On ‘America Recycles Day’

Students to Learn About Evolution of Altogether Recycling

DENVER (Nov. 1, 2007) – North Denver students in grades 5-12 will tour the area’s new Altogether Recycling™ plant as part of the celebration of America Recycles Day Nov. 15.

Executives of Altogether Recycling sent letters to the leaders of more than two dozen schools in the north Denver area, inviting their students to learn first-hand about the cutting-edge technology of Altogether Recycling, which automatically sorts recyclable materials into aluminum, paper, cardboard, etc.

Children will receive a fact-sheet that explains how Altogether Recycling saves thousands of trees and millions of gallons of water on a monthly basis. Perhaps of greatest note, children will begin to form or reinforce a healthy respect for the world and the environment they are going to inherit in the coming years.

“When children learn at a young age the importance of recycling, they incorporate the concept as a habit of their everyday living, and everybody benefits,” said Brent Hildebrand, vice president of Altogether Recycling. “The Altogether Recycling plant opened just two months ago, and we’re excited about the opportunity to lead the recycling community in the outreach to our children.”

After the tours, students will engage in a conference room discussion about the recycling process and how it can affect them directly and indirectly. They will also learn about the Altogether Recycling tagline: “Recycling Has Evolved.”

Reporters are also welcome any time of the year to schedule tours of the Altogether Recycling plant at 645 W. 53rd Place, Denver, Colo., by calling 303-410-4971.

About Altogether Recycling™

Denver-based Altogether Recycling is a Colorado owned-and-operated entity committed to working with partners throughout the state. Its cutting-edge technology separates a wide variety of recyclable materials from a single, mixed stream. Those recyclables include aluminum, cardboard, bottles, cans, newspaper, office paper and some plastics. Substantial amounts of the commodities recovered at the Altogether Recycling facility are resold to local businesses. The new plant at 645 W. 53rd Place in Denver gives the recycling community a place to join forces in the effort to divert increasing amounts of material away from landfills. Altogether Recycling is a division of Alpine Waste & Recycling. For information, go to www.altogetherrecycling.com.
